## What clients say about Judy

*"The help in sorting through all the demands, expectations, and pressures of starting new in a senior-leadership role and identify the couple of things I really needed to focus on to be successful in my first year. I was coming into a new role in a new company and a new industry, so it felt overwhelming at times. What Judy was able to help me do was really narrow in on the key messages I wanted to deliver and the key relationships to build." DVP, Healthcare*
